WEB TECHNOLOGIES
HANDS-ON-TOOLS

Experience

Software Developer

NP Software Services Pvt Ltd

August 2023 – October 2024
Kanyakumari, TN, India

- Developed and maintained full-stack web applications using Java, Spring Boot, Angular, and MySQL.
- Designed RESTful APIs to manage data flow between the frontend and backend, ensuring smooth communication and performance.
- Created responsive, user-friendly interfaces using Angular, improving user engagement and reducing bounce rates.
- Optimized backend performance by refactoring code and tuning SQL queries, reducing data retrieval times by 15%.
- Collaborated with cross-functional teams to gather requirements and deliver features on time using Agile methodology.
- Performed API testing using Postman to ensure accurate data handling between systems.

Android Application Developer (Intern)
NSIC – Technical Services Centre.

July 2022 – August 2022
Chennai, TN, India

- Focused on **frontend development** for an Android application, gaining hands-on experience designing user interfaces (UI) for mobile apps.
- Worked on the **Facebook app front page design**, applying best practices for mobile design and usability, ensuring a clean and intuitive user experience.
- Learned Android **UI/UX design principles** and implemented **Android Studio layouts**, ensuring smooth navigation and responsiveness on various screen sizes.
- Collaborated with senior developers to understand the overall architecture of Android applications and contributed to discussions on improving **UI performance** and **user engagement**.

Projects

Marvel Movie Website

One month (2023)

Java | HTML | CSS | TypeScript | Bootstrap | MYSQL

- Handled the development of the Marvel Movie Website, demonstrating proficiency in HTML, CSS, TypeScript, and Bootstrap.
- Designed a visually appealing and responsive interface with dynamic content and implementation of responsive RESTful APIs.
- I achieved project completion in a rigid timeframe, showcasing efficiency and dedication.

Artificial Intelligence Voicebot

Two months (2023)

Python

- To develop a voice bot that can effectively interact with users, answer their questions, and assist in a domain to improve customer service.

Job Recruitment System

Three weeks (2023)

Java | JFrame | MySQL

- Java's Swing library (Jframe) will design a user-friendly graphical user interface (GUI) and create a normalized MySQL database schema to store candidate information, job listings, and other relevant data.
- To provide a service to specific graduate employees and graduates to recruit for their positions.

Smart Fashion Recommender application

Two months (2022)

HTML | CSS | JAVASCRIPT | MYSQL

- Building a Smart Fashion Recommender Application with HTML, CSS, JavaScript, and MySQL for Personalized Style Recommendations.
- To provide specific recommendations to consumers based on their browsing and previous purchases.

Home Education

Two months (2021)

HTML | CSS | JAVASCRIPT | MYSQL

- Building a Comprehensive Learning Platform with HTML, CSS, Java, and JavaScript for the front end and the back end will be designed by MySQL service.
- To improve existing Home education for small children.
